RELIANOID

2201 Menaul Blvd NE STE A
Albuquerque, New Mexico 87107
USA

Phone: +1 (505) 460-0050

RELIANOID provides advanced Application Delivery and integrated security solutions to protect and optimize critical digital services. Our high-performance ADC (Application Delivery Controller) combines load balancing, reverse proxy technology, and built-in security controls into a single, unified platform.Designed for secure environments, RELIANOID helps organizations safeguard web applications, APIs, and enterprise services against evolving cyber threats. Key security features include advanced TLS/SSL management, Web Application Firewall (WAF) capabilities, DDoS mitigation strategies, rate limiting, IP filtering, geo-blocking, and full support for mutual TLS (mTLS).Our platform supports Zero Trust architectures by enforcing encrypted communications, certificate-based authentication, and granular access control across on-premises, cloud, and hybrid infrastructures.
