MIRACL

London
United Kingdom

MIRACL provides the world's only single step Multi-Factor Authentication (MFA) which can replace passwords on 100% of mobiles, desktops or even Smart TVs.MIRACL Trust® ID is a SaaS solution which has no reliance on hardware or OS security features. A combination of proprietary cryptography and protocols provide true MFA security with no sensitive data stored or transmitted. Credential Stuffing, Phishing, Man-in-the-Middle and Replay attacks are stopped dead.End-user enrolment is seamlessly embedded within your registration process and the entire service takes only hours to integrate. This provides a friction-free replacement for outdated security practices such as passwords, OTPs, SMS Texts, push notifications, authenticator apps and key-cards.By eliminating hardware requirements and multi-step processes, your users will love the simplicity and you will appreciate the reduction in support and maintenance overheads.
