ZenGRC is the SaaS remedy for legacy GRC heartburn. ZenGRC streamlines control management to provide tangible value because it speeds up audit and vendor management tracking and consolidates risk mitigation tasks. Since ZenGRC only takes 6-8 weeks to implement, you can speed compliance allowing your teams to focus on security work while saving time on mundane tasks keeping you safer. Power Up Your Team and Accelerate Time to Value with ZenGRC:- Simple Deployment: Rapidly deploy a risk management and compliance program so you can focus on the security in information security compliance.- Unified Control Management: Map controls across multiple frameworks for visibility into defense mechanism strengths and weaknesses.- Centralized Dashboard: Access key metrics to build a compliance program that responds to the protection your information security program provides. Compliance and Risk Management Made Simple.
